

# 6th International Forum on Environmental Technologies:

***Entering the Global  
Remediation Marketplace***

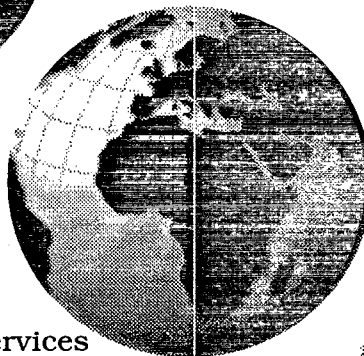

**February 2 - 4, 1998**

**The Adolphus Hotel  
Dallas, Texas, USA**

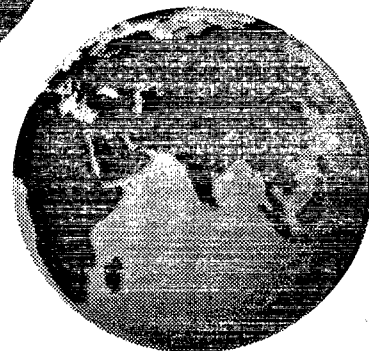

## **Forum Objectives**

- Educate environmental technology and engineering firms on the global marketplace
- Bring together financing agencies and banks with technology companies and clients
- Provide direct contact with users and buyers of environmental equipment and services
- Promote actual projects for technology firms

## **Targeting Key Sectors & Markets**

By profiling global markets, a clear picture emerges for opportunities based on common environmental challenges faced in specific manufacturing sectors: energy, industry, and water. The Forum will present information on these markets as well as promote discussion on critical marketing issues: targeting growth markets; buying patterns for site assessment and remediation technologies; financing international business opportunities; and participating in the privatization process of government owned properties.

## **Who Should Attend**

- Developers, Buyers and Users of Environmental Technologies
- Firms Interested in Entering the International Marketplace
- Consulting and Environmental Engineering Firms
- Financing Agencies
- Government Officials

To receive the proposed Forum agenda, please fax your name, company, address, phone number, fax number & e-mail address to (215) 628-8916.

If you received this flyer through the mail you are already on our mailing list

*A Technology Vendor session will be held the final day of the Forum. Buyer/User/Vendor networking will be encouraged.*

If you have any questions regarding the Forum please call (800) 783-3870
